## EXPERIENCE

### **CCred. November 2016 - Until today**

Collaborated with the Networking Team in some projects that worked with LALA Company, Vistamex and Yamada using skills in Networking like Switching and Routing and configuring IP Cameras for the security of the companies.

### **CCred. April 2016 - July 2016**

Web Developer using Node.js for build a domotic system using a Raspberry Pi 3 device to control sensors and as a container for a Web application,HTML for the interface structure, Bootstrap for responsive design and MongoDB as a DBMS. This application was connected via Rest API with a Meteor application created by other team member with the goal to share information between applications.

### **So-Software. December 2015 - April 2016**

Collaborated in a Web Application created using Yii2 for the Nayarit's public works government dependency (Secretaría de Obras Públicas del Estado de Nayarit). Most of my collaboration was on the design side

---
